I've been feeling strangely ambivalent about the whole thing. It's a nice box of food. The ingredients are all organic and fairly good. But it was \$19 for a 32-ounce container of tiramisu--weighing less than a pound. And when I looked at the nutritional label, I noticed that it's almost 10 times as much fat, sugar and calories as a regular Tiramisu. So I went on the Internet this afternoon and found a recipe for making at home the same tiramisu from a less expensive package of frozen meals. I may try it out and see if I can make it more economical in the long run, if not more healthy. The present invention relates to a mounting structure for a semiconductor chip and a method for mounting a semiconductor chip. More particularly, it relates to a mounting structure for a semiconductor chip and a method for mounting a semiconductor chip, which makes it possible to obtain a semiconductor device having stable characteristics with a good yield. To mount a semiconductor chip to a mounting board, methods are used in which a semiconductor chip is placed on the mounting board and then the semiconductor chip is fixed to the mounting board by using an adhesive or the like. As methods used for mounting semiconductor chips, there are

methods in which a semiconductor chip is bonded to the mounting board by using an adhesive, and methods in which a semiconductor chip is fixed to the mounting board by using a solder.
