CycleWise Recovery is a file recovery software that helps you restore deleted files from any drive, including your system drive. The program supports all file system types including FAT32, NTFS, FAT16, NTFS5, exFAT, and ReFS. It can be used to retrieve lost files after you have used the Shift+Del key combo to remove deleted files, or the Shift+Ctrl+Del key combo to permanently delete files. The recovery process is actually quite simple. The tool allows you to select the file name, its size, and the type of file to scan the deleted file. For instance, if you accidentally deleted a word document, simply select "Recover Word document" from the application's main screen and all your missing files will be restored. The tool can also scan for deleted files that are located on the network. You are able to use three scan modes in CycleWise Recovery. They include file search, full disk scan, and file system scan. As far as its functionalities are concerned, the software can retrieve missing files from the system drive, all removable drives, CD/DVD, and USB flash drives. The program allows you to apply filters by file type. The file search mode is handy because it lets you locate files on the system drive, all removable drives, and external ZIP/USB, removable SmartMedia, MemoryStick, and SD cards. The application works on various versions of Windows including Windows 2000, 2003, XP, Vista, 7, 8, and 8.1. CycleWise Recovery also includes a built-in help file and an online demo. How to install and use CycleWise Recovery? To install CycleWise Recovery, launch the setup file that you find on the download page. The application will automatically scan the computer and locate the missing file or folder. You are asked to click "Restore" to start the file recovery process. You can also download the free demo version of the program. In order to make sure that the program works fine with your operating system, you should perform the following test: Run the application and wait for it to detect the location of your files. Select "Scan the computer for missing files." In case you are missing a file, the software will show a list of available options. Click "Restore." You will be asked to specify the name of the
